

## Editorial

Ashok Shyam<sup>1, 2</sup>

On behalf of the Editorial Board, I am pleased to present JOR July-December 2021 issue. As the world is battling with the pandemic, it has been difficult to find the right frame of mind for research and publication. We would like to record our gratitude to the contributors for the timely completion of the submission and review process.

This issue contains original article on “Recent Trends in Surgical Techniques for High grade Spondylolisthesis” written by Rajendra Sakhrekar and another review article on “An Overview of Avascular Necrosis of Femoral Head Management” written by Rajendra Sakhrekar, Rajeev Joshi, Sahil Sanghavi, Madhav Borate, Parag Sancheti & Ashok Shyam. Issue contains original article “Functional Outcomes of Distal Humerus Fractures Fixed by Orthogonal Double Plating” written by P. Manoj Sai Kumar, Suresh Babu CR, Sai Laxman Anne; another original article deals with “Credibility of Three Column Fixation in Schatzker Types V And VI Tibial Plateau Fractures” written by Karthik Gopathy, Sailaxman Anne, Prathap Parvataneni.

We as an organisation need your support to reach greater heights. Please do consider JOR as a venue for your research work in the field of orthopaedics and rehabilitation. The Editorial Board members are making special efforts to improve submitted manuscripts in terms of language and content.

Thank you for your support

Dr. Ashok Shyam
